Please notice all the information are related to the Regolamento Urbanistico (zoning legislation) adopted in March 2014 and actually under approval.
**A new face of the City/1**

- **URBAN UPGRADE AND REGENERATION / Polycentric and metropolitan Florence**
- Target: Florence as a metropolitan capital
  - Final approval of the planning rules
  - New public spaces (gardens, squares, parking lots) in areas where the city is too dense
  - Public guidance of private interventions through implementation plans and agreed permits to build denser
  - Transformation of over 700,000 square metres of empty containers: new spaces for residence, social housing, services, coworking, innovation

**A new mobility**

- **Tramway. Lines 2 and 3**
  - Landmark timelines and sites organised to minimise any inconvenience
  - 3km of stone paving
  - 80km of re-asphalted roads for example via di Serragli, via Romana, Via della Colonna
  - Summer LTZ
  - New telematic doors
  - Florence electricity
  - 14 ha new pedestrian areas

**Municipality of Florence**

- **WASTE**
  - Objective more recycling 65%
  - Green
  - Aim lower emissions -20% CO2
  - Strengthening door-to-door collection
  - Campaigns to raise awareness among citizens
  - New underground rubbish skips
  - In three years to replace all the old rubbish skips

**Florence digital**

- **200km Broadband**
- **Double the digital highway**
- **Power ups**
  - Online Services
  - Interactive multimedia systems
  - OpenData

**Florence city of European and international culture/1**

- **FLORENCE THE KNOWLEDGE AND HIGH EDUCATION HUB**
  - CAMPUS OF THE TONGJI UNIVERSITY OF SHANGHAI
  - SAN FLORENCE PROJECT
  - OPERA OF FLORENCE

**Florence city of European and international culture/2**

- **THE NEXT BIG EVENTS**
  - 2014
    - UNESCO FORUM on culture and cultural industries
  - 2015
    - FIRENZE CAPITALE
    - SYNOD AND THE POPE’S VISIT
  - EXPLO 2015 related events
  - 750th ANNIVERSARY OF DANTE ALIGHIERI'S BIRTHDAY

**Florence, City of the Opportunities**
The complex consists of the Vivarelli - Colonna palace with an adjoining garden, and another adjacent building connected to the main one. The main facade with the entrance is on Via Ghibellina, with a facade that is characterised by various elements of value. The heart of the complex is, however, an Italian garden, which is overlooked by all the buildings, decorated with a circular fountain, in line with the colonnade on the ground floor, and a wall fountain. On the ground floor there is a spacious entrance which is characterised and embellished by a wide staircase, a double colonnade is also located at the entrance looking onto the garden; the rooms on the first floor of the building are completely frescoed. The building is in excellent condition, and is currently home to some Municipal Offices. The programmes of the Administration, however, foresee a re-standardization of municipal offices, which shall also free this location that, for location and characteristics of intrinsic merit, lends itself to being used as the headquarters office of high representatives. It should be stressed the presence of a driveway, and some already available parking spaces.
A project carried out by the city of Florence and co-financed by the Region of Tuscany in the context of the urban sustainable development plan has been selected as one of the best innovative urban projects in Europe: it is the restoration of the former Florentine prison “Le Murate”. The redevelopment of the complex, located in the heart of the historical centre of Florence, has had a long gestation and received a tranche of EU funding. It has enabled the recovery of an area historically excluded from the urban and social fabric of the Santa Croce district, bringing public housing into the city centre, while providing new public spaces and pedestrian access routes, as an incubator for innovative businesses and a centre for the arts, workshops and shopping.

Today the project is at an advanced stage, and it only remains to assign a few commercial and other spaces for offices.
The building complex is located along Via di Careggi, in a hilly and panoramic area, at the edge of the main hospital complex in Florence (Careggi). It consists of the main building, called “Villa Nova”, and a number of buildings of a later period built around the villa to meet the needs of the private health activities that had settled there. The complex is currently abandoned in part, because it no longer responds as regards its characteristics to the technical requirements for this type of activity, and it is suitable for the type and location to its recovery with the establishment of residential use. The preservation of the principal historic building and the demolition and reconstruction of more recent and worthless portions are expected; the presence of a large park (over an acre) with a gentle slope may allow the development of a high-quality residential settlement.
D’ANNUNZIO

LOCATION Via Gabriele d’Annunzio

DESCRIPTION

The building complex consists of Villa Santa Maria, a large historic building completely abandoned since 2008, two additional buildings of high architectural value (Villa Elena is currently unused and Villa degli Angeli used only in part) and a number of buildings, which have arisen in mid-sixties, as an extension of the historical building complex. The large and articulated complex occupies the slopes of the hill to the north-east of Florence, and looks for the most part on the last stretch of the street G. D’Annunzio in the vicinity of the square N. Tommaseo in Settignano. Used for a long time as a convent and private school, currently it is for the most part abandoned and adapts to the type and location for its recovery with the establishment of residential use. Conservation of the two buildings of merit; renovation of the Villa Santa Maria, and demolition and reconstruction with equal volume of the most recent portions are planned.

REVIEW DATE

30/09/2014
The architectural complex of the former College “Alla Querce” is configured as an aggregation of buildings grew up around the original nucleus of a suburban villa of Grand Ducal property since the seventies of the nineteenth century. The large and complex structure as it is today, developed in linear bodies parallel to the via della Piazzuola, occupies the lower slopes of the hill, rejoining with the above via delle Forbici through a sequence of terraces arranged in gardens and areas dedicated to sport. The complex, which is a recognised cultural asset, is now abandoned and is appropriate to host a tourist accommodation, which spatial characteristics it already presents in part by virtue of his previous destination to college and boarding school; interesting large volumes of the refectory, on the Ground Floor. Given the architectural features of merit, it is assumed a restoration of the existing building.

1) The architecture of the complex is simple and functional; used for many years as a high level college, can be destined to a receptive use without the need for major construction projects.

2) The tables give an idea of the size of the complex, the height of which is mitigated by the conformation of the terraces of the surrounding garden.

3) One project, already confirmed with the Service for Architectural Heritage, provides for the allocation of accommodation throughout the complex, with large common and conference areas, and the construction of an underground parking lot in the area of relevance.

Hilly and panoramic position
Proximity to areas of high residential value: Fiesole, Via Bolognese
More than one hectare of parkland, garden and sports areas of relevance
Organization of space already adjusted to a receptive use
Implementation Plan: approval of the City Council is not required

Retention of existing trees and terraces in the garden
Inserting parking spaces in proportion to the sleeping accommodations made

Geologic hazard
Hydraulic hazard
Seismic hazard

The architectural complex, the result of many transformations over the centuries, occupies the area where the first convent of the Padri Cappuccini settled in Florence in 1536. It has become the property of the Marquis Rosselli Del Turco as a result of the downsizing of religious institutes ordered by the grand ducal government, which authorized its use by the Suore Stimmatine in 1855 and the same was donated to them in 1969 by the heirs. The convent was decommissioned in 2005, and in the same manner the farm buildings were abandoned by tenants of agricultural funds, while the Town Planning Regulation provides for the complex the change of use to the residence.

**REVIEW DATE** 30/09/2014
The current configuration of the complex "Oasis of the Sacred Heart of Jesus" is derived from an initial core of a nineteenth-century structure - former stables outside the city belonged to the Florentine nobles Ricasoli Counts - and the many transformations and expansions suffered from property during the nineteenth and twentieth century, even in consideration of the repeated changes of use that have characterised the history of the complex, while remaining in the frame of hospitality (home of the religious, home-school, boarding school and, more recently, hostel for the elderly and holiday home). The complex of great historical and architectural interest, is suitable for its type and location for its recovery with the installation of residential destination.
The complex is located in one of the most prestigious hilly areas of Florence's landscape and environment, to the east of the main hospital of Careggi, characterised by the presence of buildings mostly of isolated character with large adjacent plots of land intended for typical crops, as well as parks and gardens. It mainly consists of two buildings: Villa San Giuseppe, of the fifteenth century, and another less valuable building, in addition to a large wooded park. For a long time used as a hospital, it was abandoned in 2000. The objective of the transformation is the recovery of the residential real estate and the adjacent park, with an intervention that promises high quality for the context, the characteristics of the property and the surrounding green area.

1) View on Via degli Incontri, with architectural elements of merit

2) Site plan with the Villa (north-east) and the secondary building

3) Plan of the First Floor of the House, that highlights the simple spatial distribution

Retention of existing trees and terraces in the garden
Inserting parking spaces in proportion to property units built

Hilly and panoramic position
Proximity to the Main Hospital of Careggi
Over three acres of adjacent wooded park
Great architectural value of the structure
Implementation Plan: approval of the City Council is not required

**DE AMICIS**

**LOCATION** Viale De Amicis - Via Milazzo

**DESCRIPTION**
The transformation involves a craft complex (former dry cleaners Volpi) located within a large closed block with access from the viale E. De Amicis through a passage, on the ground floor of the building continuing along the avenue, as well as a small driveway on Via Milazzo. The craft activity has been abandoned from a long time: it is foreseen the transformation and change of use to a wide range of activities, such as offices and private-sector service. The works shown on the form refer to a draught prepared earlier for a transformation to residential use, which is no longer considered compatible; however, they have been incorporated to provide design ideas that, at least in part, can be recovered even with a different destination.

**SERCAMBI**

**LOCATION**  Via Sercambi, Via Caracciolo, 5-7-9-11-13

**DESCRIPTION**
The architectural complex is comprised in the area of compact tissues of the nineteenth - twentieth century, and occupies most of the block, formed between 1920 and 1940, between via G. Sercambi and via F. Caracciolo that overlooks Mugnone near the Ponte alle Riffe. The transformation of the complex, currently abandoned, proposes to redevelop a now incongruous area compared to the predominantly residential context, adapting it to that destination. This would also allow adjusting the road network, which is currently conditioned by the alignments of buildings, and provide the general public with a green space inside the block.

### ARETINA

#### LOCATION
Via Aretina 279

#### DESCRIPTION
The transformation involves a set of buildings built between the frieze building in via Aretina and the railroad in the area of natural commercial centre of the so-called square of Varlungo, created as a result of the competition “Three squares for Florence” (2005). Mainly used as stores and warehouses of commercial activities, the complex of buildings has been abandoned since 2010. Given the proximity of the railway and the poor accessibility of the area, it is provided for the transformation with a change to office use including private service activities, destination that includes a wide range of service activities that do not generate an excessive town planning load; the transformation is carried out through building renovation of existing volumes.

ERBOSA

LOCATION Via Erbosa

ITALY

FLORENCE

AERIAL VIEW

DESCRIPTION

The former manufacturing complex, with main access from via Erbosa, consists of four buildings side by side with a small adjoining two-storey building used as an office, a portion of a shed, an open area flanked by a series of garages. The buildings date back to 1954 and were subsequently expanded. The proximity to the Commercial Centre of Gavinana, and the interior location inside a residential block suggest a commercial use for medium sales structures that can complement the district commercial offer. The area of relevance may allow you to create parking spaces and other spaces between the new buildings.

**FORMER TRAM DEPOT**

**LOCATION** Via Fabrizio De Andrè

**DESCRIPTION**
The properties owned by the municipality located along via E. De Andrè, unused today, are placed in a context that grew up in different ways, which hosts a variety of activities. Of all the buildings present in the area, in a poor state of maintenance, it is apparent, however, a building constructed in the early ‘900 and originally used as a workshop for trams. The building has interesting architectural features, which deserve to be preserved and maintained. The area also has practical potential for development and improvement of current conditions, mainly related to its location and its overlooking the Arno, as well as the connection with via E. De Nicola. It can therefore be assumed a mix of commercial and directional functions, aimed at the enhancement of the historical housing stock but also the redevelopment of the whole area.

DESCRIPTION

It is a buildings complex of significant size located near the Arno River, bordered to the east by the viaduct Varlungo and to the west by the river Mensola. Born as the seat of the Fratelli Franchi textile factory, activity disused since 1992, recovered in more recent times, it is currently occupied by warehouses, workshops, artisans and wholesalespremises. The objective of the transformation is to keep in most of the complex the production destination by allowing the establishment of a retail commercial structure (average sales structure), in fact the location and morphology of the building can be adapted to accommodate this new feature also because of its easy accessibility.

REVIEW DATE

30/09/2014
It is a property owned by the municipality and which is currently the registered office of the Environment Management, located in the hills south of Florence and close to trails that connect with prime areas like Arcetri and the Viale dei Colli. The noble villa belonging to the large Possession of Rusciano, is located in the middle of a public park with access from via B. Fortini and Via di Ripoli. The building is in need of restoration, and, for its morpho-typological nature, is inadequate to accommodate the municipal offices. It is already included in the “Plan of disposals and valuations 2012”, while the objective of its development remains through the establishment of new uses, particularly in tourism, without changing the public usability of the park. A portion of the adjacent private area is reserved for the building, for approximately 5,000 square metres, with historic green spaces of remarkable quality.
MAIN AREAS OF URBAN REGENERATION
Florence, City of International Knowledge

FORTINI

LOCATION Via Benedetto Fortini, 143

DESCRIPTION
The architectural complex was built with production purposes, such as art workshop in order to renew and pass on the ancient techniques of hand weaving of silk and precious metals. The Arte della Seta Lisio foundation, in the head offices of via B. Fortini, kept a collection of looms and one of antique textiles and technical designs as well as educational workshops and a specialised library on the techniques and history of the fabrics, all activities that have been moved now to other real estate properties in the adjacent area, leaving the building and nearby area in disuse. It is expected the conversion to residential use, as suggested by the very accessible context, and full of green spaces.

REVIEW DATE 30/09/2014
**MONTE OLIVETO**

**LOCATION** Via di Monte Oliveto, 76

**DESCRIPTION**
Originally an Olivetan convent, the complex of Monte Oliveto was used as a military hospital from the nineteenth century to the 90s and was abandoned in 1997. The building has already obtained authorisation from the competent Directorate General on alienation and the subsequent re-use for residential purposes, an intended use also deemed compatible from a town planning point of view, given its location in a hilly area among the most prized of Florence, and the architectural and historical value of the complex.

**SITE AREA** 4.281 mq

**EXISTING USABLE SURFACE** 5.300 mq

**COSTRUKTION YEAR** 1600

**ACCESS**
In the south area of Florence, near the ring road boulevards (Viale dei Colli), about 2 km from the Tramway - Line 1

**REVIEW DATE** 30/09/2014
**CONVENTINO NUOVO**

**LOCATION**  Via Giano della Bella - Via del Casone

**DESCRIPTION**

It is a building owned by the municipal authorities adjacent to the old Convent, historical complex of great value which now hosts educational and promotional activities on traditional Florentine crafts. The new volume, built in the 80s as an extension of the crafts complex, was intended to accommodate additional laboratories and is now totally unsuited to the function for which it was created, as well as incongruous compared to the historical context, so that it is foreseen the complete demolition and reconstruction of a new volume for residential use. It is a rare opportunity to design new buildings in an important historical context, and in a “human scale” neighbourhood. The outdoor area is expected to make the necessary appurtenant parking spaces.

**SITE AREA**  3.848 mq

**EXISTING USABLE SURFACE**  3.400 mq

**COSTRUKTION YEAR**  1980

**ACCESS**

In the south-west of Florence, close to the future expansion of the line of the Tramway n. 1, about 6 km from the Impruneta exit of Highway A1

**PROPERTY**

Located in a historical and residential context

Adjacent area with possibility of creation of parking spaces

No constraint in the reconstruction

Implementation Plan: approval of the City Council is not required

**TYPE OF INTERVENTION**

**VERANELLA**

**LOCATION** Via San Felice a Ema

**DESCRIPTION**

It is an eighteenth-century complex, originally born as a farm of the college of Poggio Imperiale and subsequently transformed into a villa dedicated to the reception of guests at the boarding school, since 1962, it hosts a Health Assistance Residence, for the exercise of which a new building was erected in a tergal position with respect to the main building, which preserves historical and architectural value. Held for sale due to inability to adapt to existing standards for the established function, the complex is well suited for placement and type, to assume the residential function, also enriched by the proximity to the complex of the College of Poggio Imperiale and the Viale dei Colli. The new destination is to be carried out through conservative interventions for the property of architectural and historical value, and the demolition and reconstruction for the remainder.

EX INPS

LOCATION Via Foggini, 2

DESCRIPTION

It is a newly constructed building located in Via G. B. Foggini, near the intersection with Viale Etruria in the direction of the road Firenze-Pisa-Livorno, being comprised within an area of recent settlement. Once headquarters of the INPS offices for the Isolotto area, then decommissioned in 2012, the building may lend itself as regards the type and location to host a business structure. It is expected to be recovered through building restoration, or partial demolition and reconstruction.

**REVIEW DATE** 30/09/2014
**BARACCA FERROVIA**

**LOCATION** Via Francesco Baracca, 186

**DESCRIPTION**

The area subject to transformation, between Via F. Baracca and the rail track in the stretch where the two are more closely aligned, has welcomed productive and commercial activities. It has a double driveway, directly from Via F. Baracca and indirectly from Via del Barco through an area of railway property on which there is also a parking lot where there is the loading and unloading of goods. The building, which occupies most of the lot, consists of two buildings side by side, a building on Via F. Baracca and a shed covering an area currently used for parking. The transformation aims at re-organisation of the area and reduction of surface area, with the goal of streamlining the access and the interior spaces to the lot. The eligible destinations are a mix of residential and commercial property, through the complete demolition of the existing structure.

**SITE AREA** 3.136 mq

**EXISTING USABLE SURFACE** 3.100 mq

**CONSTRUCTION YEAR** 1960

**ACCESS**
At about 1 km from the Airport and from the Firenze Nord exit of the A1 Milan-Naples highway, on the route of the tramway - line 4 in the design phase

**REVIEW DATE** 30/09/2014
The property occupies an inner portion of a large block located immediately behind the fascia of the nineteenth-century expansion. It has been for a long time the headquarters of the bus operator Lazzi company, who had stationed workshops, warehouses, offices, in addition to the uncovered great square of manoeuvre, the property results to be abandoned since 2008. For location, size and morphology the complex lends itself to accommodate a productive activity, or a wholesale business in the service of the historic nucleus. The main limitation is access, at the corner of the Mercadante and Vivaldi streets; in contrast, the broad adjacent area allows to create parking spaces and manoeuvring areas.

2) Floor plan of the current state - Ground Floor, with the adjacent area
1) The driveway of the complex, at the intersection of Mercadante and Vivaldi streets
FORMER TOBACCO FACTORY

LOCATION Via delle Cascine - Via Tartini

DESCRIPTION
The complex of the Tobacco Factory is perhaps the most important opportunity of transformation of the city of Florence, by position, size and function. The area is located in the immediate vicinity of the Historic Centre, near the Arno, the largest park in Florence (La Cascine) and the new Parco della Musica; known to the Florentines for the presence of the historic Teatro Puccini, it is now a complex in good condition, characterised externally by an architecture of rationalist style. The possibility of recovery of the complex provides for a mix of functional uses (residential, tourism and hospitality, commercial offices) that can guarantee an "urban effect," and has attracted great attention from the operators of Fashion, also because of the proximity to the Former Leopolda Station and the Fortezza, locations of events related to Pitti Immagine. Plans include a structured intervention, with the conservation of historic portions (especially the curved front on Via delle Cascine), the demolition of the recent portions and the reconstruction of a new urban and architectural structure.

GROSS USABLE AREA

END USED ALLOWED

- residential: 46.117
- retail: 7.982
- office: 23.059
- tourism: 11.529

REVIEW DATE 30/09/2014
The area bounded by Via Antonio Canova, via delle Muricce, via Luigi Pampaloni and Viale Etruria includes the complex of the former factory of Campolmi, as well as other crafting activities and constitutes an unresolved area due to the presence of the ruin of the former factory of Campolmi, of interest as an example of industrial archaeology, next to undeveloped areas. It is a complex situation, partly because of the sectioning of property that has not allowed the desired recovery over time. The formulated solution requires a unitary intervention, a necessary condition for the correct transformation of the area, with the maintenance of the ruin of the former factory of Campolmi, around which the entire project revolves as a space in a large green park. The size of the area also makes possible various configurations for new residential buildings.

**Description**

**End Used Allowed**

- Residential: 14,000 sq m
- Retail
- Office
- Tourism
- Industrial

**Restrictions**

- Retention of the existing ruins as an example of industrial archaeology
- Construction of a section of road access to the neighboring school
- Construction of a parking area for the nearby public green area
- Implementation of appurtenant parking spaces according to the number of new housing units built
- Maximum height of the reconstruction: 5 floors

**Limitations**

- Geologic hazard: Low
- Hydraulic hazard: Average
- Seismic hazard: High

**Review Date**

30/09/2014
**DESCRIPTION**

The property, built in 1930 and expanded several times until the 60s, hosted the headquarters of a company of taps and fittings until 2007, the year in which the asset is transferred and the artefacts of Via A. Squarcialupi discontinued. The objective of the transformation is to re-integrate the complex into the surrounding tissue, mainly with residential purposes, through an intervention of demolition and reconstruction involving the recovery of the existing usable surface in a new building of reasonable thickness that affects only the front street, freeing up the rear for parking lots and other condominium areas. The reconstruction will reach the height of adjacent residential buildings, equal to four storeys above ground.

Florence, City of International Knowledge

**SITE AREA** 2,966 mq

**LOCATION** Via Squarcialupi, 14-16-18

**ITALY**
This transformation affects the residual area of the rail compendium of Porta al Prato, once occupied by the Officine Grandi Riparazioni (OGR) and the goods yard. Following a long process of re-appropriation by the city of the areas occupied by the railway operations, to date a large part of the railway complex has still remained to be redeveloped, situated between the residential neighbourhood Leopolda Paisiello, the New Opera House, the Macinante channel and Via delle Cascine. The city demand that has generated more and more in this place, as a result of specific transformations of the former railway station area, supports the transformation of the compendium into a new settlement with a mainly residential use, along with a mix of commercial, tourist-accommodation, office functions. The project is closely related to forecast infrastructures that cross the area: the viability of penetration Rosselli Pistoia and the tram line 4, in place of the railway track Firenze Porta al Prato Pisa. The presentation picture shows a possible study of inclusion in the urban context.
CARRAIA-GEMINIANI

LOCATION Via Geminiani - Via di Carraia

DESCRIPTION

It’s one of the few areas of new construction confirmed by the new schedule of the Municipality of Florence, in the area of urban development in the North-West of Florence (Novoli). The project covers a large area between Via F. Geminiani, Via di Carraia and the Pisa-Florence railway, traversed longitudinally by Via G. Pietri (the road is not open to vehicular traffic) where there is only one building, the head office of branch 1 of the Poste Italiane. The processing area due to its location lends itself to accommodate a mix of uses with the prevalence of residential use in addition to other uses compatible with it, such as businesses and offices.

The property complex under transformation has been for a long time an integral part of a larger production plant for the production of plastic components. A few years ago the municipal authorities approved an urban renewal project on the entire production area for the construction of residences and services, of which the area currently under consideration is part. The objective of the proposed transformation is to accomplish the original idea of the overall urban regeneration of the area by creating a portion of the city with residences, green spaces, services, able to integrate with the new district of Piagge, one of the largest and most recent areas of expansion of Florence, built quickly, and now in the process of social development and urban planning.

**PISTOIESE**

**LOCATION** Via Pistoiese

**DESCRIPTION**
The project involves a frieze area in via Pistoiese, completely free, in an area that has suffered a substantial increase of new residential settlements in the last two decades. It is one of the few areas of new construction confirmed by the Structural Plan of Florence, also because it represents an empty piece in a densely built context, and in which we are switching from commercial and manufacturing construction to a predominance of residence and services. In this case there is already a developed project at a detailed scale, and verified with the Authorities.

EX PANIFICIO MILITARE

LOCATION Via Marti - Via del Ponte di Mezzo

ITALY

Florence

FLORENCE

AERIAL VIEW

DESCRIPTION

The area of the former Caserma Guidobono, used from 1923 to 1936 to provide essential supplies to the military structures of the city, is part of a densely built urban environment. Abandoned for a long time, owned by the Ministry of Defence until March 2002, then sold, and became private property, for many years the area has been the subject of controversial proposals of transformation that have seen lengthy discussions between citizens and committees. The currently planned transformation intends to use the opportunity of converting an area of such amplitude, hitherto inaccessible, which becomes again part of the city to lower the density of the surrounding tissue by concentrating the building for a commercial structure in the northern portion and allotting the remaining part for a public park and parking spaces.

---

**DESCRIPTION**

It’s one of the few areas for the new construction by the recent planning of Florence. The work covers a wide area bounded by Viale A. Guidoni, Via A. da Schio, Via Accademia del Cimento and Via E. Barsanti completely free in a neighbourhood that has undergone a substantial change of the last decade due to the establishment of new strategic functions (Palace of Justice, the business centre of the Cassa di Risparmio, University) who have left the historical centre in replacement of a large productive abandoned area. The processing area for its location and for changes in the surrounding environment lends itself to accommodate a mix of uses with the prevalence of the intended office use including the activities of private service, supplemented by a significant portion of residence use.

1) View of a project proposal developed by the Faculty of Architecture

2) Overview of the area, now undeveloped: Mercatino area on the left, a strategic area of public property, on which the Municipality is developing a hypothesis of mixed public-private services

3) Site plan of the design solution
BELLAGIO
LOCATION Via di Bellagio

DESCRIPTION
The area includes a crafts complex at the border with the municipality of Sesto Fiorentino, long since abandoned. The location, in a foothill context, and the characteristics of adjacent areas which are predominantly residential, permit the transformation of the surface in a settlement for residential use, creating a small public parking with trees and dedicating a portion of the surface to social services and recreational facilities for the district. In this case it has already been developed and shared with the local administration, a project that provides two-storey buildings, with the row arrangement type and large areas of adjacent private and communal green spaces. The architecture aims to recreate a modern context, but in harmony with the surrounding rural housing.

RESTRICTIONS
20% of the surface area to be allocated to social housing
Associated car parks in proportion to the housing units built are to be created
Expansion and new lighting of a stretch of via di Bellagio is to be carried out
Public car park with trees is to be made
To make and give in to municipality a small social and recreational service

1) The area is located at the foot of the hills north of Florence, (Careggi, Castello) and a project has already been developed on it
2) The project includes 24 residential units of different cuts, spread over two floors, with large appurtenant green spaces
3) The architecture is geared towards energy sustainability and types that recall the rural construction, with extensive use of exposed brick
**MECCANO TESSILE**

**LOCATION** Via Taddeo Alderotti

**DESCRIPTION**
It is a functionally autonomous portion of the complex called “Ex Meccanotessile”, historical Florentine industry, which was originally dedicated to the workers’ housing and service areas. Acquired by the Municipality and partially restored in the 80s, this portion is destined to disposal, unlike the rest of the complex that will maintain a public destination instead. Its development is realised in a residential destination, entirely destined to social housing, which is to be located near an area entirely dedicated to public services of a cultural nature, and a large public green area, whose location is very appreciated in a extremely dense neighbourhood and lacking in green spaces.

**Giuliani**

**Location**: Via Reginaldo Giuliani

**Description**: The area is part of a consolidated historical system, predominantly for production use, that develops between the railway and via R. Giuliani, already the subject of several important episodes of reconversion to residential use. The area is for the most part abandoned and has a high coverage ratio, it is in fact almost completely clogged. The front along Via R. Giuliani does not exceed two floors, structures along the railway are in poor condition. The transformation envisaged by the planning rules has the aim of a complete reorganization of the area re-establishing the proper relationship between empty and full areas, proper accessibility, and inserting uses that maintain the right mix of functions in the area, therefore, commercial and industrial ones; The Municipality has over time developed some general studies, aimed at identifying guidelines for the recovery of this delicate area.

**Site Area**: 3,790 sq m

**Existing Usable Surface**: 3,900 sq m

**Construction Year**: 1950/60

**Access**: In the North-West of Florence, adjacent to the Firenze-Rifredi railway station and about 3 km from the Firenze Nord of the Milan-Naples A1 highway

**Property**: Public

**Type of Intervention**: Restoration

**Restrictions**: Construction of a road link between Giuliani and the road network along the Railway

**Limitations**: Geologic hazard, Hydraulic hazard

- Tourism: 1,300 sq m
- Industrial: 1,300 sq m

1) View of one of the entrances on Via Reginaldo Giuliani

2) View of the building line along the Via R. Giuliani

3) Three-dimensional view of a project proposal in principle, now outdated
The complex comes with productive functions, and is part of a newly formed building fabric which has intensified in recent years the prevalence of residential use; it is inserted in the block between Via delle Gore and Via di Quarto, in the vicinity of the hospital of Careggi. The main building has been carried out on a project of Edoardo Detti in the late 60s for the “Nuova Italia” publisher, and presents features of a certain architectural interest. The property is currently disposed of, and is expected to be recovered with partial demolition (relative to the portion added to the main body) to include in it commercial functions and offices.

BUFALINI
LOCATION Via Bufalini - Via de' Servi - Piazza Brunelleschi

DESCRIPTION
It is one of the most important interventions provided in the historic centre of Florence, very close to Piazza Duomo. The large property complex is in fact located in the heart of the historic nucleus, and consists of properties of different age, type, quality. For many years, it has been the historic seat of the Cassa di Risparmio di Firenze, after its transferring from the city centre to the area of Novoli, buildings are unused today, even though they are in good condition. The expected transformation aims to bring new vitality to the entire sector, through a series of interventions aimed at creating a functional mix of qualified residence and functions related to this. In addition to the residence, there are provided businesses of the neighbourhood, an average sale property, a large quantity of offices and service industries, the construction of a car park for the residents of the historic centre.

CAVOUR

LOCATION Via Cavour - Via Micheli

DESCRIPTION

The building dates back to the 30s and is situated in the corner between the via C. Cavour and via P.A. Micheli, between the Ring Road Avenues of Florence and the Historic Centre, and at the centre of the district of Maglio, whose structure dates to the last years of the Grand Duchy of Tuscany. It was used by the University of Florence until 2010, and today it is empty, even though it is in good condition. The intervention will regard the recovery of the building for residential purposes, which combines well with its typological and architectural nature; given its recent use, the building needs moderate repairs to be adapted to the new function.

REVIEW DATE 30/09/2014
The architectural complex of the former Private Nursing Home “Villa Cherubini”, inserted in a context of historic value, consists of a central building, having the original architectural elements typical of nineteenth-century cottage, and two side buildings built between 1950 and 1965 for the expansion of health care destination, and which are incongruous with the context. The complex is currently abandoned and is suitable for the type and location of the settlement for residential purposes, also in view of the wide adjacent area, in part arranged as a garden, and that can allow you to easily create the required parking spaces. As for the main body a restoration intervention is required, the two recent portions may be demolished and rebuilt from scratch.
The complex is located in Via San Niccolò, in the heart of one of the most characteristic neighbourhoods of Florence with its small scale fabric of shops, small restaurants and hangouts. The complex is the result of the aggregation of buildings built at different times with different original intended purposes. Born as a reception centre (day care centre and home care for the elderly and youth hospitality services), today the structure is no longer able to adapt to new functional requirements and regulations required from the activity. We therefore propose the inclusion of residential use, certainly well established in the district, and that with some non-invasive interventions can find space in this articulated building.
**EX ENEL SALVAGNOLI**

**LOCATION** Via Salvagnoli - Via Poggi

**ITALY**

**DESCRIPTION**

The property lies within the historic nucleus, is placed in the nineteenth-century context of the Piazza Indipendenza, although of a later period (early twentieth century). Headquarters of Enel’s offices until their transfer which took place in 2004, since then it is unused. As regards localization and morphology, it is adequate to be transformed into a residence, by relatively modest works given the configuration of the building, and the internal distribution that can lend itself to the new function with few changes.

Q1 Q2 Q3 Q4 Q5
This is a property located along the avenues of the Ring Road and owned by Inarcassa, abandoned for a long time now; the transformation is embodied in the recovery of the building with the change of the original public use (administrative service) to the private offices. The building is of a fairly recent origin, but has aesthetic features of a certain quality. The restoration of the building has already been started by the owner and is nearing completion; in this case, then the interest is directed mainly to potential buyers and/or end users of complex.
EX MEYER

LOCATION Via Luca Giordano

DESCRIPTION

The area in question is a set of buildings of nineteenth-century origin, some of which of a certain value, set around internal spaces of communication with green areas. The area has been vacated by the transfer of the Meyer hospital, and today a new destination is proposed with the aim of enhancing the real estate assets of the Meyer Hospital for finding resources to reinvest. It was therefore decided to focus on the settlement of the residence use, in line with the objectives set out in the Structure Plan and the predominant features of the area. Two of the existing pavilions overlooking via Frà D. Buonvicini have already been acquired within the municipal assets and intended for nursery (under construction) and public housing.

REVIEW DATE 30/09/2014
**FORMER MUNICIPAL THEATRE**

**LOCATION** Corso Italia

**DESCRIPTION**
The building of the municipal theatre is part of a network of nineteenth-twentieth century formation, on the edge of the historical nucleus. Subsequent alterations, renovations and modernizations to which the theatre was submitted from the origin to the present, make it an architecturally fragmented body, which has occupies a good portion of the block. The construction of the new opera house allows reconsidering this important area with new features, and with a slight reduction of the reconstructed surface. The aim of the intervention is the realisation of an important new settlement characterised by a functional mix able to revitalise the entire area, with a prevalence of the residence (which could also absorb the entire construction potential) but also with the possible inclusion of tourist-accommodation, commercial activities, offices, preserving the historical part of the famous theatre and operating with demolition and reconstruction of incongruous added parts.

**REVIEW DATE** 30/09/2014
The complex consists of two buildings and occupies the central portion of a block of the expansion area of nineteenth-century next to the Avenues of the Ring Road. Made in the early 60s, the architectural image of the property is owed to the architect Giovanni Michelucci, curator of the project of the fronts of the great internal space of representation (Hall of offices open to the public). The complex is currently unused; since it is still very significant in terms of size, it has been opted for the establishment of a mix of uses that it is hoped to be easily incorporated into the building complex to be recovered, with the prevalence of residence but also with the inclusion of commercial activities, tourist-accommodation ones, offices.

### GRAMSCI

**LOCATION**
Via Gramsci, 16

**ITALY**

**FLORENCE**

**AERIAL VIEW**

### DESCRIPTION

Building located in the corner between Avenue A. Gramsci and Via P. Colletta, realised between 1956 and 1957 according to a design by the architect Pierluigi Spadolini for the Italian National Accident Prevention Body. After the divestiture in the early 2000s, restructuring was initiated, now almost completed, by which the property acquired residential use. The transformation is aimed at the change of use of most of the property to the tourist accommodation use, deemed adequate both for the building and in the frame of compact tissue of the nineteenth-twentieth century in which this is included; to this it can be added a modest commercial share for the services typically dedicated to customers (restoration).

### SITE AREA

### REVIEW DATE

30/09/2014
The complex occupies an entire city block, built on the urban grid drawn from the Avenues of the Ring Road designed in 1860 by architect Poggi for Firenze Capitale. The buildings have various construction dates: some are contemporary with the construction of avenues, others with the early twentieth century, a portion of which dates back to 1940. Since 1905 technical and operational headquarters of the State Railways, the complex results for the most part abandoned since 2005. The objective of the transformation is the functional upgrading of the complex, which, while maintaining a high proportion for office use, lends itself to accommodate other compatible functions such as residence and business. It should be stressed the close proximity to the Fortezza da Basso, home to the main fair centre in Florence.
MADONNA DELLA TOSSE

LOCATION Via Madonna della Tosse - Via Spaventa

DESCRIPTION

The current building, built around the pre-existing Sensi cottage, was then used as the seat of the House of the Society of Jesus and its activities, the last of which the boarding school for the cultural education of the Jesuit Fathers, decommissioned in 2011. The objective of the transformation is to find a new suitable use of the property, which lends itself for conformation to a residential destination, made interesting by the presence of a large area of relevance, in part consisting of a garden, and which may allow the realisation of parking spaces to serve the new housing. It’s required the restoration of the historical building, while it is eligible the restructuring of the most recent parties.

**MANNELLI**

**LOCATION** Via Mannelli, 29/R

**ITALY**

**FLORENCE**

**AERIAL VIEW**

**Description**

The transformation involves a crafts complex overlooking along via Mannelli with a 2-storey building above ground, and mostly developed in the interior of the block, with access only through an opening to the ground floor of the building. The complex is born and has expanded with the addition of various buildings between 1900 and 1930. The crafting activity has been abandoned for a long time and artefacts are in a fair state of preservation. The building along Via Mannelli is home to some residential units. It is foreseen the transformation with change of use for office type activities, including activities of private service, a destination that includes a wide range of activities that do not require the constant presence of people and at the same time do not generate an excessive urban planning load.

**REVIEW DATE** 30/09/2014
The building consists of two structures arranged around an interior courtyard, both with load-bearing structure of reinforced concrete and exposed stone and concrete finishes. Designed by the Architect Giovanni Michelucci and built in 1966 on behalf of the Ministry of Posts and Telecommunications. The ground floor is occupied by the gallery – a real internal road, parallel to Via Pietrapiana, marked by the large vertical pillars - which runs alongside and leads into the hall open to the public. Currently the property is partially unused except for some MEF offices the transfer of which is expected to be carried out soon. The project entails the recovery of the building through the establishment of a new functional mix that includes residence, commercial areas and offices; all through a respectful intervention on the special architectural qualities of the building.
**REPUBLICA**

**LOCATION**  
Piazza della Repubblica

**DESCRIPTION**

The building, overlooking Piazza della Repubblica, is the portion of the architectural wing according to plans of the architect Vincenzo Micheli between 1885 and 1895 on the occasion of the drainage works undertaken under Firenze Capitale. Used for a long time partly as headquarters of a credit institution, the property is now mostly abandoned. The building lends itself to accommodate a commercial activity, by virtue of its location in the square symbol of shopping in the historic centre of Florence, and also of its architectural features of merit that can give added value to the activity. An internal courtyard gives light to the complex, and it was also hypothesised the cover with a glass window structure.

**REVIEW DATE**

30/09/2014
The Complex of San Firenze is a rare example of Baroque architecture in Florence. The order of the Filippini built the complex with a new church, the chapel and the monastery, dedicated to the patron saint San Filippo Neri, starting from 1648. The strong stone facade dates back to 1715, the monastery was built between 1745 and 1749, the new Oratory was completed in 1772 and connected to the Monastery. The Complex of St. Florence is in the heart of the oldest part of Florence, behind the Palazzo Vecchio, next to the Museum of the Bargello, a few steps from Piazza Santa Croce and the Uffizi and hosted until 2012 the offices and courtrooms. Part of the building is home to the Church and the convent of the Padri Filippini. The complex currently has a monumental staircase that connects the first and second ground floors, and a second staircase is located in the South wing. The recovery is intended to ensure compliance with the delicate context through an office destination including private service activities, which can host inter alia training, culture and research, along with a commercial portion.

**End used allowed**
- Residential: 1.080
- Office: 9.720
- Tourism: 1221
- Industrial: 10.800

**Restrictions**
- Need to ensure the compatibility of new features with the historical architecture
- Accessibility conditioned by the presence of a pedestrian area

**Key Opportunities**
- Proximity to the central railway station of Florence and the historical centre
- Dominant position on the Piazza San Firenze
- Architectural features of great value
- Internal distribution arranged around the central cloister
- Implementation plan: approval of the City Council is not required

**Limitations**
- Geologic hazard
- Hydraulic hazard
- Seismic hazard

**Contact Office**

**Review Date**
30/09/2014
**DESCRIPTION**

The building, located in Via Guelfa, consisting of four buildings arranged as a quadrangle around a central exclusive garden, has been home to a structure of hospitalisation for self-reliant older women. The original nucleus consists of a sixteenth century arcade, now walled up, present in the east wing, and the chapel, part of which probably is coeval with the arcade; the elevation and the construction of the other wings, as well as the installation of the central garden, date back to the Fifties and Sixties. Today the complex is no longer adequate to accommodate the reception business, it is therefore expected to be able to insert different uses, even as an alternative to one another: residence, offices, tourist accommodation activities, in accordance with the characteristics of the original historical nucleus.

**END USED ALLOWED**

- residential: 2,500 mq
- retail: 2,500 mq
- office: 2,500 mq
- tourism: 2,500 mq
- industrial: 2,500 mq

**KEY OPPORTUNITIES**

- Proximity to the central railway station of Florence and the historical centre
- Architectural features of merit
- Presence of a central courtyard with garden
- Implementation plan: approval of the City Council is not required

**RESTRICTIONS**

- Finding of appurtenant parking spaces to the extent required by the specified destination
- Preliminary verification assessing the compatibility of the new features with the architectural structure

**LIMITATIONS**

- Geologic hazard
- Hydraulic hazard
- Seismic hazard

Florence, City of International Knowledge

## SANTA ROSA

### LOCATION

Lungarno di Santa Rosa

---

**DESCRIPTION**

The area located on the river embankment of Santa Rosa is occupied by a building that is developed over four floors above ground that was built in the Fifties. The facility is used by the Social Health District of Santarosa. The Azienda Sanitaria Firenze, in the process of reorganisation of the existing health facilities in the area, plans to dispose of the property. As regards the characteristics of the context in which the building complex is located, it lends itself to accommodate the residential use, inclusive of neighbourhood commercial activities. It is to be pointed out the overlooking of the Arno river, and proximity to the district of Oltrarno district, where compared to the historical centre (Duomo, Signoria) a strong component of local residence remains.

### SITE AREA

1950

1) The area is located at the foot of the hills North of Florence, (Careggi, Castello) and a project has already developed there

2) The project includes 24 residential units of different sizes, spread over two floors, with large appurtenant green spaces

3) The architecture is oriented towards energy sustainability and types that recall the rural construction, with extensive use of exposed bricks

**REVIEW DATE**

30/09/2014
The transformation involves a set of craft workshops mainly located in the interior of a freestanding block with access from Via G. Zanella, near the district of Oltrarno. The premises are no longer suitable for the activity that takes place in them, especially because of accessibility problems with heavy vehicles that have to stop for loading and unloading in Via G. Zanella. A complete transformation is proposed with a comprehensive change of use of the private service assets, which includes a wide range of activities that do not require constant the permanent presence of people and at the same time do not generate an excessive planning strain, with the recovery of the buildings forming the historic backdrop and the demolition and reconstruction of the remainder. The image below refers to a maximum study of the distribution of buildings and open spaces.
